DIMENSIONS: 84cm (33") High, 22cm (8<sup>3/4</sup>") Wide, 27cm (10<sup>3/4</sup>") Deep

PRICE: £580

STOCK CODE: 46022

### HISTORY

These characterful spouts were the means by which water was raised from a cistern, well or trough. They can still be found mounted on out-buildings and service light-wells in larger houses - complete with an iron armature at the side and a paddle mechanism within to raise the water. They were usually encased within a timber cabinet. Often it is only the lead hopper that survives the centuries.

Most early Georgian rain-water goods and plumbing and cisterns in houses of note were made from lead (Pb) - hence the term "plumber".
