A PAIR OF ENGLISH CAST IRON TREE-PLANTERS,

20th Century, Removed from the Esplanade at Bridlington, Yorkshire, each planter square in plan, with rounded corners, tapering in elevation with a reed moulding running around below the rim, old paint - green and silver; the interior revealing the construction of two halves bolted together through a flange, a sizable circular drainage hole in the base,

DIMENSIONS: 50cm (19^{3⁄4}") High, 90cm (35^{1⁄2}") Wide

STOCK CODE: 44805

HISTORY

These large pots are made to withstand the beating that municipal park furniture receives - not just from the seaside visitors but the North sea gales in the off season. We're not sure they came from the pier itself - as was mooted - both piers are very exposed and we suspect nothing would grow there. We think they may have been positioned somewhere on the Seaside Esplanade or in the Park.
