A RUN OF DECORATIVE VICTORIAN CAST-IRON POSTS AND CHAINS,

set in limestone plinths, by (or for) F. Want & Sons of Dereham Road, Norwich, each of the seven knopped tapered posts with ball finials and mounted in a square section plinth, the chain links with alternating spikes,

DIMENSIONS: 79cm (31") High, 79cm (31") At Highest, 39cm high each post without stone,

STOCK CODE: 45513

HISTORY

The incised inscription for "F. Want & Sons" is unexplained. It is likely that the posts and chains ran along a frontage with this series of posts marking the Want premises boundary. The stone block plinths are of differing heights which can be compensated for on installation. A spare post, not mounted on stone, is included in the seven. Four posts have chain connection hasps at 90degree setting, the rest are in line. One corner post lacks its ball finial.
