A VICTORIAN CAST IRON AND TIMBER RAILWAY PLATFORM BENCH,

ex. London & North Eastern Railway - reputedly from a station platform on the branch-line between Ely and March in Cambridgeshire

the rectangular seat with rounded edges and a plank back-rest, raised on three pierced cast-iron supports,

DIMENSIONS: 87cm (34³/₄"") High, 364cm (143³/₄"") Wide, 50cm (19³/₄"") Deep

STOCK CODE: 46015

HISTORY

The oval recess in the back rest would have borne a cast-iron name plate with the station name – highly collectable it has long since been removed. The proportions of it dictate a short name, perhaps of only five letters.
