STOCK CODE: 30448

HISTORY

Lindsey's cement floor and wall tiles are made using an ancient process which was revived in Victorian times. Commonly referred to as encaustic or inlaid tiles, this process has been widely used in various locations around the world including The Netherlands, France, Brazil and Cuba.

The demand for this age old process declined after the introduction of ceramic tiles in the 1960's, but Lindsey Lang designs hopes to help to keep this traditional craft alive.
