NATURALIST RAMBLES ON THE DEVONSHIRE COAST, BY PHILIP HENRY GOSSE. THAUMANTIAS CORYNETES,

Published in London, by J. Van Voorst, 1853

Living in London, Gosse's prodigious hobby of publishing work on his observations resulted in a breakdown from overwork. He was advised to go and live in the country and moved to Devon in 1853 where he wrote 'A naturalist's rambles on the Devonshire coast' The book successfully popularised the science of marine biology, but his reputation as a serious scientist later suffered with the publication of 'Omphalo' in which he refuted developmental theory, aiming to reconcile geology with the Bible's account of creation.

DIMENSIONS: 33cm (13") High, 26cm (10^{3/4}") Wide, 2cm (0^{3/4}") Deep

PRICE: £220

STOCK CODE: P01317 A
