THE AMERICAN LOBSTER 1896

Chromolithographs based on the work of Francis Hobart Herrick

Francis Hobart Herrick (1858-1940) was for many decades Professor of Biology at Western Reserve University, Ohio. His early research focused on the American lobster in New England. His work revealed that over-harvesting egg-producing adult lobsters was threatening the species and risking destruction of the American lobster industry.

DIMENSIONS: 37.5cm (14^{3/4}") High, 30cm (11^{3/4}") Wide, 2cm (0^{3/4}") Deep

STOCK CODE: P01267 Pl. 26
